GHS Labeling

There are six key elements to a GHS label that you need to know. The sample label depicted below explains the components and design of GHS labels.

**Product Name Identifiers**
Identifies the chemical or substance. Should match the product name or identifier used on the SDS.

**Signal Word**
Indicated relative level of hazard. "Danger" is used for most severe instances, while "Warning" is less severe.

**Pictograms**
Convey health, physical and environmental hazard information. May use a combination of one to five symbols.

**Hazard Statements**
Phrases that describe the nature of hazardous products and oftentimes the degree of hazard.

**Precautionary Statements**
Phrases associated with each hazard statement that describe general preventative, response, storage or disposal precautions.

**Manufacturer Information**
This identifies the manufacturer’s company name, address and telephone number.

---

**Boric Acid**
CAS RN: 10043-35-3

Danger

May damage fertility or the unborn child.

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection. If exposed or concerned: Get medical advice/attention. Store locked up. Dispose of contents/container to black drum.
