

## Section 3: Proposal

The site is a 2.5 hour drive from the state capital.

The site is about a 2 hour drive from the worst affected area in the state.

## Site

The site I chose was high enough that it would not be affected by flooding, had a national highway as access, and was as close to the most affected area as possible. It also has a densely settled population at the base who can use it when there are no floods
